EE504: Power Electronic Converters

Index

Sr. No.	Title	Date	From Page No.	To Page No.	Marks Out of 10	Faculty Signature
1	Simulation and analysis of Multipulse Converters using PSIM®/MATLAB®					
2	Analyze and evaluate operation of Jones Chopper under different loading conditions					
3	Simulation and Analysis of Non Isolated Topologies of dc to dc converters using PSIM®/MATLAB®					
4	Simulation and analysis of Isolated Topologies of dc to dc converters using PSIM®/MATLAB®					
5	(i) Analyze gate triggering circuit of dc to dc converter (ii) Analyze operation of Buck Converter in open loop condition					
6	Simulation and analysis of single phase Voltage Source Inverter(VSI) using single pulse and multiple Pulse Width Modulation(PWM) techniques in PSIM®/MATLAB®					
7	Simulation and analysis of single phase full bridge inverter using SPWM (unipolar and bipolar) techniques in PSIM®/MATLAB®					
8	Simulation and analysis of three phase inverter for 120^0 and 180^0 mode of operation using PSIM®/MATLAB®					
9	Analyze and evaluate operation of single half bridge inverter with single pulse width modulation technique					
10	Analyze the operation of Uninterrupted Power Supply (UPS) for single phase operation					
11	Analyze and evaluate operation of single full bridge inverter with sinusoidal pulse width modulation technique					
12	Analyze the operation of Boost Rectifier with power factor correction
